

THE BADGE SAYS INTERNATIONAL,  
BUT IT'S GOT  
**YOUR NAME**  
ALL OVER IT.

If you want the best dump truck you can get – bar none – there's only one name to know: International. After all, you've never been one to settle for second best. And there's no need to start now.

With International® Integrated Dump trucks, the chassis and dump body are engineered as a single unit for higher performance, reliability, durability and value. And they're delivered with a single-minded

purpose: to help you maintain your rightful position as an undisputed leader in your profession.

Whether you choose an International® 5000i Series or 7000 Series Integrated Dump, you've got a truck that looks good on the job, good on the road, good on your bottom line.

International Integrated Dump trucks. Because nothing less than your reputation and your success is at stake.

# PRIDE'S A SIN. BUT SOMETIMES IT CAN'T BE HELPED.

International® 7600 Integrated Dump

## International® 5000i Series Integrated Dump.

Simply put, International® 5000i Series Integrated Dump trucks are the ultimate severe service trucks – the standard by which all others are measured. Because no matter how tough the job, these trucks don't know the meaning of "quit." Like you, they just keep pushing until the job is done. From the ground up, they're built for the kind of work that causes lesser trucks to call in sick. Unforgiving terrain? Wicked weather? Grueling hours? Bring it on. International 5000i Series Integrated Dump trucks are more than ready – with outstanding maneuverability, legendary International durability, high payload capacities and an unbelievably smooth and quiet ride.

## International® 7000 Series Integrated Dump.

International® 7000 Series Integrated Dump trucks are severe service workhorses, pure and simple. Take the most punishing construction jobs you can imagine, and these trucks tackle them with unequalled style, grace and ease. That's what a century-long heritage of building the hardest-working trucks will do for you. On the work site, these trucks are all business – with proven components, inspired design and advanced technology through and through. Yet inside the remarkably spacious, quiet and comfortable cab, it's all pleasure. You certainly don't need a truck to show you're the best, but these trucks have a way of doing just that.

Your International® Integrated Dump truck is spec'd, financed and serviced at your International dealer. That's parts and service support on chassis, body, hoist and lift axle; comprehensive warranty coverage and administration; and innovative finance, lease and insurance programs – all from a single source.

## International® Integrated Dump Truck Specifications

### International® 7000 Series dump trucks.

- 107" (272 cm) BBC International 7000 Series dump trucks offer outstanding durability, reliability, powertrain performance and maneuverability, plus a refined driver environment.
- The on/off-highway frame system delivers unparalleled strength and durability, resists corrosion and is lighter than double-rail systems. The result: bigger payloads, yielding more profits on every trip.
- For applications requiring front-mounted equipment, a 29.1" (74 cm) set-forward front axle position is available.
- For applications that demand increased maneuverability, a 40" (102 cm) set-back front axle position is available.
- Factory-built, set-forward all-wheel-drive axle configurations are also available.
- Wide-track front axles provide up to a 50° wheel cut for outstanding maneuverability.
- The industry's most comfortable and spacious cab measures 72.5" (184 cm) wide and 58" (147 cm) floor to ceiling to offer more shoulder room, headroom and belly room.
- The International® Diamond Logic® electrical system simplifies troubleshooting and enhances diagnostics for increased uptime.
- Front axles up to 20,000 lb (9,072 kg); rear axles up to 52,000 lb (23,587 kg).
- International® I-6 engines deliver 210-340 hp (157-254 kW) and 520-1150 lb-ft (705-1559 N·m) of torque. Engines from Caterpillar® and Cummins with up to 470 hp (351 kW) are also available.
- Standard 2-year limited warranty is offered on cab and chassis. Integrated body partners offer a 3-year limited warranty on dump bodies; Crysteel offers a 5-year limited warranty on dump bodies.

### International® 5000i Series dump trucks.

- 120" (305 cm) BBC International® 5900i set-forward axle with 30" (76 cm) BA and classic good looks.
- 114" (290 cm) BBC International® 5600i with 52" (132 cm) BA for outstanding set-back front axle loading and maneuverability.
- 114" (290 cm) BBC International® 5500i with set-forward axle and 28" (71 cm) BA for maximum Bridge-Formula payload.
- 12.25" (31.12 cm) standard frame-rail system has one of the industry's best strength-to-weight ratios.
- All aluminum cab insulated for superior temperature control and noise reduction.
- Front axles up to 22,000 lb (9,979 kg); tandem rear axles up to 70,000 lb (31,751 kg).
- Engines from Caterpillar and Cummins are available with up to 565 hp (421 kW).
- Factory-built, set-forward all-wheel-drive axle configurations are also available.
- An 8x6 Tridem configuration is available in Canada.
- Standard 2-year limited warranty is offered on cab and chassis. Integrated body partners offer a 3-year limited warranty on dump bodies; Crysteel offers a 5-year limited warranty on dump bodies.
